

# Marine Invasive Species Group @ SAMS

Dr Elizabeth Cook (PI) | [ejc@sams.ac.uk](mailto:ejc@sams.ac.uk)

LinkedIn | Marine Invasive Species

- Highly likely that significant increase in commercial shipping in northern high latitudes will occur over the next few decades.
- In the UK, SAMS has led the way in developing an early warning system; rapid detection techniques and policies in place to control or eradicate an introduced species before secondary spread.
- Would be great to hear from anyone who is interested in working on developing something similar for the Arctic...

# THANK YOU!
